Copyright and Permissions Statement

Manuscript: “UzABSA-LLM: Parameter-Efficient Fine-Tuning and Multi-Domain Annotation for Uzbek Aspect-Based Sentiment Analysis”

Authors: Mersaid Aripov, Sanatbek Matlatipov, Jaloliddin Rajabov, and Abdullah M. Almarashi

On behalf of all co-authors, I provide the following statement regarding copyright and the use of third-party material in this submission.

1. Licensing. We agree that, upon acceptance, the article will be published open access under the Creative Commons Attribution 4.0 International (CC BY 4.0) license, with copyright retained by the authors. No funding or institutional condition requires an alternative license; the standard CC BY 4.0 terms are acceptable to all authors.

2. Originality of figures and tables. All figures and tables are the authors’ own original work, created specifically for this study, and none reproduces previously published material. Figure 1 (ChatML instruction template) was composed by the authors; Figure 2 (training and validation dynamics) consists of the authors’ own plots of their own fine-tuning experiments, produced using the Weights & Biases experiment-tracking tool; and Tables 1–5 report statistics and results generated entirely by the authors.

3. Third-party material. The manuscript reproduces no figures, schemes, tables, photographs, or substantial text extracts for which the authors do not hold copyright. Accordingly, no permission from any external copyright holder is required for publication.

4. Source data. The multi-domain review corpus was collected from the publicly accessible Uzbek business-review platform Sharh (<https://sharh.commeta.uz>), with the explicit permission of the data owner, Mr. Sardor Berdiyev, CEO and Co-founder of Commeta, as acknowledged in the manuscript. Documentary evidence of this permission can be provided on request. The derived annotated corpus is released under an open license on Zenodo (DOI: 10.5281/zenodo.18790639), and the UzABSA fine-tuning dataset is the authors’ own publicly released resource on Hugging Face.

5. Declaration. We confirm that, to the best of our knowledge, the manuscript contains no material that infringes the copyright or other rights of any third party, and that all necessary permissions for the data used have been obtained.

Sincerely,

Sanatbek Matlatipov
